

Public Employees' Retirement System of the State of Nevada

Actuarial Valuation and Review as of June 30, 2019

This report has been prepared at the request of the Retirement Board to assist in administering the Fund. This valuation report may not otherwise be copied or reproduced in any form without the consent of the Retirement Board and may only be provided to other parties in its entirety, unless expressly authorized by Segal. The measurements shown in this actuarial valuation may not be applicable for other purposes.

December 11, 2019

Public Employees' Retirement Board 693 West Nye Lane Carson City, Nevada 89703

Dear Retirement Board Members:

We are pleased to submit this Actuarial Valuation and Review as of June 30, 2019 for the Public Employees' Retirement System of Nevada (PERS). It summarizes the actuarial data used in the valuation, establishes the actuarially determined contribution requirements for the 2019-2020 plan year and analyzes the preceding year's experience.

This report was prepared in accordance with generally accepted actuarial principles and practices at the request of the Board to assist in administering the Plan. The census and financial information on which our calculations were based was provided by the Retirement Office. That assistance is gratefully acknowledged.

The measurements shown in this actuarial valuation may not be applicable for other purposes. Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and changes in plan provisions or applicable law.

The actuarial calculations were completed under the supervision of Mark Hamwee, FSA, MAAA, Enrolled Actuary. We are members of the American Academy of Actuaries and we meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion herein. To the best of our knowledge, the information supplied in the actuarial valuation is complete and accurate. Further, in our opinion, the assumptions as approved by the Board are reasonably related to the experience of and the expectations for the Plan.

We look forward to reviewing this report at your next meeting and to answering any questions.

Sincerely,

Segal Consulting, a Member of The Segal Group, Inc.

Section 1: Valuation Summary

Purpose

This report has been prepared by Segal Consulting to present a valuation of the Public Employees' Retirement System of the State of Nevada as of June 30, 2019. The valuation was performed to determine whether the assets and contribution rates are sufficient to provide the prescribed benefits. The contribution requirements presented in this report are based on:

- The benefit provisions of the Public Employees' Retirement Act,
- > The characteristics of covered active members, inactive vested members, retired members, disabled members, beneficiaries and survivors as of June 30, 2019.
- The assets of the Plan as of June 30, 2019, provided by the Retirement Office,
- Economic assumptions regarding future salary increases and investment earnings, and
- Other actuarial assumptions regarding member terminations, retirement, death, etc.

Significant Issues in Valuation Year

- 1. The ratios of the actuarial value of assets to actuarial accrued liabilities have increased from 74.7% to 74.9% for Regular Ref: Pg. 10 members and remained at 76.5% for Police/Fire members.
- 2. There were actuarial experience gains due to a lower than expected change in the Consumer Price Index (1.65% vs 2.75% Ref: Pg. 26 expected), which resulted in lower than expected post-retirement benefit increases (PRBIs) for continuing retirees, beneficiaries and survivors over the next several years. These gains amounted to \$181 million for Regular members and \$54 million for Police/Fire members.
 - There were also actuarial experience gains and losses due to individual salary increases less than expected for continuing active Regular members and greater than expected for continuing active Police/Fire members; this amounted to a \$106 million gain for Regular members and a \$61 million loss for Police/Fire members. The average actual increase for continuing active members during 2018-2019 was 5.3% for Regular members and 7.0% for Police/Fire members.
- 3. Actuarially determined contributions may increase or decrease from year to year even if all assumptions are exactly met. For *Ref: Pg. 28* both Regular and Police/Fire members, the actuarially determined contribution rates for 2019 increased from the previous year. Both groups saw an increase due to experience losses, including the smaller than expected payroll growth used to amortize the UAAL and the actuarial experience losses during the year.
- 4. The Public Employees' Retirement Act requires an adjustment in the statutory contribution rates on July 1 of each odd-*Ref: Pg. 27* numbered year based on the actuarially determined rates indicated in the actuarial valuation report for the immediately preceding year. Since this valuation is for an odd-numbered year, no adjustment in the statutory contribution rate is required as a result of this valuation.

Summary of Contribution Rates		
	Regular	Police/Fire
Employer-Pay: ⁽¹⁾		
Statutory Rate for Fiscal Years July 1, 2019 through June 30, 2021		
(as determined from the June 30, 2018 valuation)	29.25%	42.50%
Actuarially Determined Contribution Rate per June 30, 2019 Actuarial Valuation	29.65%	43.33%
Employee/Employer: ⁽²⁾		
Statutory Rate for Fiscal Years July 1, 2019 through June 30, 2021		
(as determined from the June 30, 2018 valuation)	30.50%	44.00%
Actuarially Determined Contribution Rate per June 30, 2019 Actuarial Valuation	31.01%	44.82%

See cost-sharing mechanism in NRS 286.421.

⁽²⁾ See cost-sharing mechanism in NRS 286.410.

- *Ref: Pg. 24* 5. The rate of investment return on the market value of assets for 2018-2019 for the PERS Fund was 8.47%, and was 8.50% for the preceding year.
- Ref: Pg. 23 6. The returns on the actuarial value of assets for 2018-2019 for the PERS Fund were 7.02% for Regular and 7.06% for Police/Fire, which were less than the investment return assumption of 7.50%. As a result, the PERS Fund experienced investment losses on an actuarial value basis of approximately \$151 million for Regular and \$41 million for Police/Fire.
- 7. As indicated in Section 2, Subsection B of this report, the total unrecognized investment gains as of June 30, 2019 were Ref: Pg. 20 approximately \$523 million for Regular and \$153 million for Police/Fire, compared to gains of \$58 million and \$20 million in the previous valuation, respectively. These unrecognized gains will be recognized in the determination of the actuarial value of assets for funding purposes in the next few years and will serve to offset any investment losses that may occur after June 30, 2019. If the System earns the assumed rate of investment return of 7.50% per year (net of investment expenses) on an actuarial value basis, then the deferred gains would be recognized over the next four years as shown in the footnote on page 20.
- 8. The June 30, 2019 unrecognized investment gains of \$675 million represent about 1.5% of the PERS Fund market value of Ref: Pg. 10 assets. Unless offset by future investment losses or other unfavorable experience, the recognition of the \$675 million market gains is expected to have a small impact on the System's future funded ratio and actuarial contribution requirement. This potential impact may be illustrated as follows:
 - If the deferred gains were recognized immediately in the actuarial value of assets, the funded ratio would increase from 74.9% to 76.1% for Regular members and increase from 76.5% to 77.7% for Police/Fire members.
 - If the deferred gains were recognized immediately in the actuarial value of assets, the actuarially determined contribution rates would decrease as follows:

	2019/2020 Actuarially Determined Contribution Rate	2019/2020 Rate Reflecting Deferred Gains
Regular:	00.050/	00.400/
Employer-Pay	29.65%	29.10%
Employee/Employer-Pay	31.01%	30.46%
Police/Fire:		
Employer-Pay	43.33%	42.59%
Employee/Employer-Pay	44.82%	44.08%

- 9. The June 30, 2019 valuation reflects the benefit adjustment made by the System due to the post-retirement benefit increase (PRBI) audit. These adjustments were made for retirees with month of retirement in March to July. The adjustment for the remaining affected retirees are expected to be made by the System by the next valuation.
- 10. The payroll growth assumptions are set by the Board and affect the timing of payments toward the unfunded liabilities. Considerations for setting these assumptions include future financial conditions that are difficult for Segal to evaluate. In recent years, payroll growth has been less than assumed. This has the effect of delaying contributions toward the unfunded liabilities and could result in increases to required contributions in future years. We recommend that the Board closely monitor actual payroll growth to verify that the assumptions remain valid.
- 11. The actuarial valuation report as of June 30, 2019 is based on financial data as of that date. Changes in the value of assets subsequent to that date, to the extent that they exist, are not reflected.
- 12. In 2009, the Critical Labor Shortage (CLS) program was extended through June 30, 2015 but restrictions on eligible positions were added. This program allows PERS retirees to return to work without facing the usual suspension of retirement benefits. Subsequently, the 2015 "sunset" was removed and the program was made permanent. As of the valuation date, there were a total of 211 retired PERS members currently active and reenrolled in PERS under this provision. This program has a minimal effect on System costs.
- 13. The Actuarial Standards Board approved a new Actuarial Standard of Practice No. 51 (ASOP 51) regarding risk assessment. ASOP 51 is effective with PERS's June 30, 2019 actuarial valuation. ASOP 51 requires actuaries to identify and assess risks that "may reasonably be anticipated to significantly affect the plan's future financial condition". Examples of key risks listed that are particularly relevant to PERS are asset/liability mismatch risk, investment risk, and longevity risk. The standard also requires an actuary to consider if there is any ongoing contribution risk to the plan, however it does not require the actuary to evaluate the particular ability or willingness of contributing entities to make contributions when due, nor does it require the actuary to assess the likelihood or consequences of future changes in applicable law.

The actuary's initial assessment can be strictly a qualitative discussion about potential adverse experience and the possible effect on future results, but it may also include quantitative numerical demonstrations where informative. The actuary is also encouraged to consider a recommendation as to whether a more detailed assessment or risk report would be significantly beneficial for the intended user in order to examine particular financial risks. When making that recommendation, the actuary will take into account such factors as the plan's design, risk profile, maturity, size, funded status, asset allocation, cash flow, possible insolvency and current market conditions.

Since the actuarial valuation results are dependent on a fixed set of assumptions and data as of a specific date, there is risk that emerging results may differ, perhaps significantly, as actual experience is fluid and will not exactly track current assumptions. This potential divergence may have a significant impact on the future financial condition of the plan. We have not been engaged to perform a detailed analysis of the potential range of the impact of risk relative to the System's future financial

Section 1: Valuation Summary as of June 30, 2019 for the Public Employees' Retirement System of Nevada

Ref: Pg. 30

condition, but have included a brief discussion of key risks that may affect the System in Section 2, Subsection F. A more detailed assessment of the risks tailored to specific interests or concerns of the Board would provide the Board with a better understanding of the inherent risks and is recommended. This assessment would further discuss and highlight information and risks particular to PERS such as detailed historical experience and key events, growing plan maturity, heightened contribution sensitivity to asset and liability changes, and projected sensitivity to potential future investment returns through selected scenario or stress test projections.

Summary of Key Valuation Results

	Total (Regular and Police/Fire Combined)	
	2019	2018
Actuarially determined contribution rates for plan year beginning July 1:(1)	32.17%	31.73%
unding elements for plan year beginning July 1:		
Normal cost, including administrative expenses	17.94%	18.11%
Total rate payroll ⁽²⁾	\$6,786,900,381	\$6,508,871,854
Market value of assets	\$44,284,252,583	\$41,420,028,577
Actuarial value of assets	\$43,608,971,844	\$41,342,368,039
Actuarial accrued liability	\$57,920,215,973	\$55,069,428,741
Unfunded actuarial accrued liability	\$14,311,244,129	\$13,727,060,702
Funded ratio on actuarial value basis (AVA / AAL)	75.3%	75.1%
Funded ratio on market value basis (MVA / AAL)	76.5%	75.2%
Demographic data for plan year beginning July 1:		
Number of retired members and beneficiaries	70,056	67,108
Number of vested former members	17,341	16,607
Number of active members	109,167	107,506
Total salary ⁽³⁾	\$6,038,622,015	\$5,830,402,607
Average salary	\$55,315	\$54,233

⁽¹⁾ Average rate for the combined Regular and Police/Fire Employer-pay and Employee/Employer-pay plans.

Based on actual pay for prior year, annualized for new hires and part-time employees, and projected one year using individual salary increase assumption.

Based on actual pay for prior year, without adjustment.

Important Information About Actuarial Valuations

An actuarial valuation is a budgeting tool with respect to the financing of future projected obligations of a pension plan. It is an estimated forecast – the actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan.

In order to prepare a valuation, Segal Consulting ("Segal") relies on a number of input items. These include:

Plan of benefits	Plan provisions define the rules that will be used to determine benefit payments, and those rules, or the interpretation of them, may change over time. Even where they appear precise, outside factors may change how they operate. It is important to keep Segal informed with respect to plan provisions and administrative procedures, and to review the plan summary included in our report to confirm that Segal has correctly interpreted the plan of benefits.
Participant data	An actuarial valuation for a plan is based on data provided to the actuary by the System. Segal does not audit such data for completeness or accuracy, other than reviewing it for obvious inconsistencies compared to prior data and other information that appears unreasonable. It is important for Segal to receive the best possible data and to be informed about any known incomplete or inaccurate data.
Assets	The valuation is based on the market value of assets as of the valuation date, as provided by the System. The Plan uses an "actuarial value of assets" that differs from market value to gradually reflect year-to-year changes in the market value of assets in determining the contribution requirements.
Actuarial assumptions	In preparing an actuarial valuation, Segal projects the benefits to be paid to existing plan participants for the rest of their lives and the lives of their beneficiaries. This projection requires actuarial assumptions as to the probability of death, disability, withdrawal, and retirement of each participant for each year. In addition, the benefits projected to be paid for each of those events in each future year reflect actuarial assumptions as to salary increases and cost-of-living adjustments. The projected benefits are then discounted to a present value, based on the assumed rate of return that is expected to be achieved on the plan's assets. There is a reasonable range for each assumption used in the projection and the results may vary materially based on which assumptions are selected. It is important for any user of an actuarial valuation to understand this concept. Actuarial assumptions are periodically reviewed to ensure that future valuations reflect emerging plan experience. While future changes in actuarial assumptions may have a significant impact on the reported results, that does not mean that the previous assumptions were unreasonable.

The user of Segal's actuarial valuation (or other actuarial calculations) should keep the following in mind:

- The actuarial valuation is prepared at the request of the System. Segal is not responsible for the use or misuse of its report, particularly by any other party.
- An actuarial valuation is a measurement of the plan's assets and liabilities at a specific date. Accordingly, except where otherwise noted, Segal did not perform an analysis of the potential range of future financial measures. The actual long-term cost of the plan will be determined by the actual benefits and expenses paid and the actual investment experience of the plan. Future contribution requirements may differ from those determined in the valuation because of:
 - Differences between actual experience and anticipated experience;
 - Changes in actuarial assumptions or methods;
 - Changes in statutory provisions; and
 - Differences between the contribution rates determined by the valuation and those adopted by the Board.
- If the System is aware of any event or trend that was not considered in this valuation that may materially change the results of the valuation, Segal should be advised, so that we can evaluate it.
- Segal does not provide investment, legal, accounting, or tax advice. Segal's valuation is based on our understanding of applicable guidance in these areas and of the plan's provisions, but they may be subject to alternative interpretations. The System should look to their other advisors for expertise in these areas.

As Segal Consulting has no discretionary authority with respect to the management or assets of the Plan, it is not a fiduciary in its capacity as actuaries and consultants with respect to the Plan.

Section 2: Valuation Results

A. Member Data

i. Regular Members

The Actuarial Valuation and Review considers the number and demographic characteristics of covered members, including active members, vested terminated members, retired members and beneficiaries.

This section presents a summary of significant statistical data on the Regular member group.

More detailed information for this valuation year and the preceding valuation can be found in Section 3, Exhibits A, B, and C.

REGULAR MEMBER POPULATION: 2010 – 2019

Year Ended June 30	Active Members	Vested Terminated Members	Retired Members and Beneficiaries	Ratio of Non-Actives to Actives
2010	90,219	11,167	38,400	0.55
2011	87,975	11,931	40,675	0.60
2012	86,719	12,253	43,258	0.64
2013	87,193	13,009	45,796	0.67
2014	88,709	13,851	48,283	0.70
2015	91,124	14,206	50,877	0.71
2016	93,030	14,795	53,484	0.73
2017	93,276	15,763	55,975	0.77
2018	94,615	15,714	58,561	0.79
2019	96,072	16,409	61,104	0.81

i. Regular Members (continued)

Active Members

Plan costs are affected by the age, years of service and salaries of active members. In this year's valuation, there were 96,072 active members with an average age of 45.7, average years of service of 9.7 years and average salary of \$52,007. The 94,615 active members in the prior valuation had an average age of 45.8, average service of 9.9 years and average salary of \$51,193.

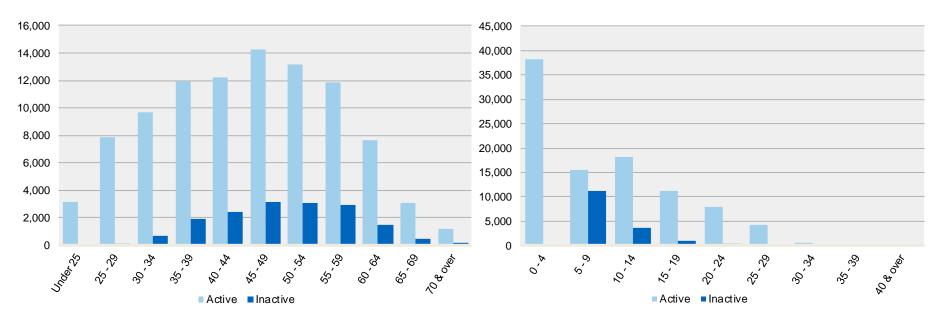

Inactive Members

In this year's valuation, there were 16,409 members with a vested right to a deferred or immediate vested benefit versus 15,714 members in the prior valuation. The average age and service of these members is 49.9 and 9.2 years, as compared to 49.5 and 8.9 as of last year's valuation date.

Distribution of Active and Inactive Regular Members as of June 30, 2019

ACTIVE AND INACTIVE MEMBERS BY AGE

ACTIVE AND INACTIVE MEMBERS BY SERVICE

Section 2: Valuation Results as of June 30, 2019 for the Public Employees' Retirement System of Nevada

i. Regular Members (continued)

Retired Members and Beneficiaries

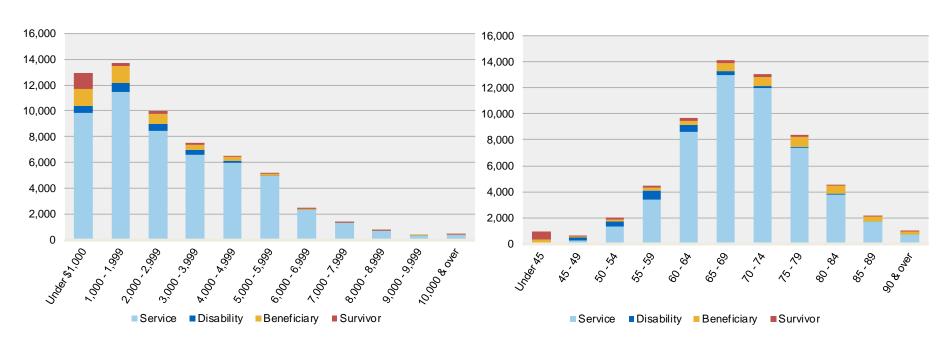

As of June 30, 2019, 54,678 retired members and 6,426 beneficiaries and survivors were receiving total monthly benefits of \$176,415,869. Of these, 1,162 retired members and 28 beneficiaries and survivors were receiving annual benefits of at least \$100,000, which represents 1.9% of all retirees, beneficiaries and survivors.

For comparison, in the previous valuation there were 52,377 retired members and 6,184 beneficiaries and survivors receiving monthly benefits of \$164,419,260, with 1.7% of those receiving annual benefits of at least \$100,000.

Distribution of Regular Retired Members and Beneficiaries as of June 30, 2019

RETIRED MEMBERS AND BENEFICIARIES BY TYPE AND MONTHLY AMOUNT

RETIRED MEMBERS AND BENEFICIARIES BY TYPE AND AGE

RETIRED MEMBERS AND BENEFICIARIES BY TYPE AND MONTHLY AMOUNT

RETIRED MEMBERS AND BENEFICIARIES BY TYPE AND AGE

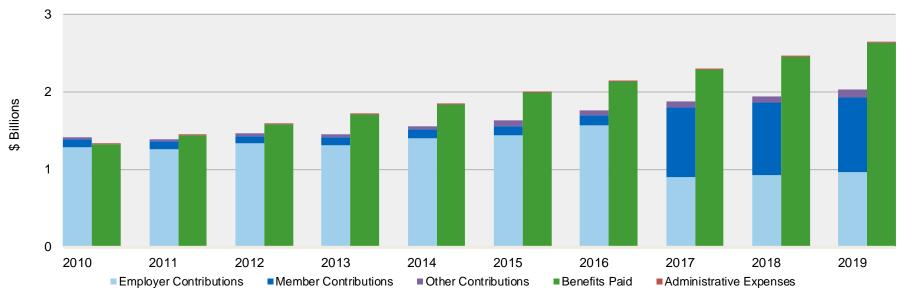

Section 2: Valuation Results as of June 30, 2019 for the Public Employees' Retirement System of Nevada

B. Financial Information

Retirement plan funding anticipates that, over the long term, both net contributions (less administrative expenses) and net investment earnings (less investment fees) will be needed to cover benefit payments.

Retirement plan assets change as a result of the net impact of these income and expense components. Additional financial information, including a summary of these transactions for the valuation year, is presented in Section 3, Exhibits D, E, and F.

COMPARISON OF CONTRIBUTIONS WITH BENEFITS AND EXPENSES **FOR YEARS ENDED JUNE 30, 2010 – 2019**

Starting in the year ended June 30, 2017, pursuant to GASB Statement No. 82, the financial statements recognize half of the employer contributions made on behalf of Employer-Pay members as member contributions.

DETERMINATION OF ACTUARIAL VALUE OF ASSETS FOR YEAR ENDED JUNE 30, 2019

It is desirable to have level and predictable plan costs from one year to the next. For this reason, the Board has approved an asset valuation method that gradually adjusts to market value. Under this valuation method, the full value of market fluctuations is not recognized in a single year and, as a result, the asset value and the plan costs are more stable.

The amount of the adjustment to recognize market value is treated as income, which may be positive or negative. Realized and unrealized gains and losses are treated equally and, therefore, the sale of assets has no immediate effect on the actuarial value.

		Regular		Police/Fire		
1	Market Value of Assets		\$34,242,125,697		\$10,042,126,886	
2	Calculation of unrecognized return	Original Amount ⁽¹⁾	Unrecognized Return	Original Amount ⁽¹⁾	Unrecognized Return	
a)	Year ended June 30, 2019(2)	\$313,413,248	\$250,730,600	\$91,717,871	\$73,374,295	
b)	Year ended June 30, 2018(2)	295,081,911	177,049,147	85,392,866	51,235,720

5	Actuarial Value of Assets 3 + 4		<u>\$33,719,407,942</u>		<u>\$9,889,563,902</u>	
6	Actuarial Value of Assets as a percentage	of Market Value of Assets(4)	98.47%		98.48%	

Market value minus prior year's actuarial value, adjusted for cash flows and expected return, minus prior year's unrecognized return.

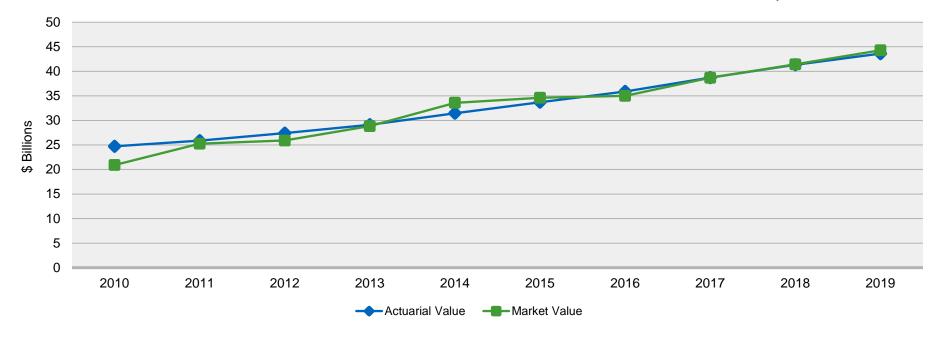

Recognition at 20% per year over 5 years.

(3)	Deferred return as of June 30, 2019 recognized in each of the next four years:	Regular	Police/Fire	Total
	(a) Amount recognized during 2019/2020	\$21,171,618	\$7,273,065	\$28,444,683
	(b) Amount recognized during 2020/2021	317,164,454	91,524,198	408,688,652
	(c) Amount recognized during 2021/2022	121,699,032	35,422,147	157,121,179
	(d) Amount recognized during 2022/2023	62,682,651	<u>18,343,574</u>	81,026,225
		\$522,717,755	\$152,562,984	\$675,280,739

⁽⁴⁾ Total actuarial value as a percentage of total market value is 98.48% for Regular and Police/Fire.

Both the actuarial value and market value of assets are representations of PERS's financial status. As investment gains and losses are gradually taken into account, the actuarial value of assets tracks the market value of assets. The actuarial asset value is significant because PERS's liabilities are compared to these assets to determine what portion, if any, remains unfunded. Amortization of the unfunded actuarial accrued liability is an important element in determining the contribution requirement.

ACTUARIAL VALUE OF ASSETS VS. MARKET VALUE OF ASSETS AS OF JUNE 30, 2010 - 2019

C. Actuarial Experience

To calculate the required contribution, assumptions are made about future events that affect the amount and timing of benefits to be paid and assets to be accumulated. Each year actual experience is measured against the assumptions. If overall experience is more favorable than anticipated (an actuarial gain), the contribution requirement will decrease from the previous year. On the other hand, the contribution requirement will increase if overall actuarial experience is less favorable than expected (an actuarial loss).

Taking account of experience gains or losses in one year without making a change in assumptions reflects the belief that the single year's experience was a short-term development and that, over the long term, experience will return to the original assumptions. For contribution requirements to remain stable, assumptions should approximate experience.

If assumptions are changed, the contribution requirement is adjusted to take into account a change in experience anticipated for all future years.

The components of the total loss of \$507 million are shown below. The net experience loss from sources other than investments was 0.54% of the actuarial accrued liability. A discussion of the major components of the actuarial experience is on the following pages.

ACTUARIAL EXPERIENCE FOR YEAR ENDED JUNE 30, 2019

		Regular	Police/Fire	Total
1	Net gain/(loss) from investments ⁽¹⁾	-\$151,381,633	-\$41,107,449	-\$192,489,082
2	Net gain/(loss) from post-retirement benefit increases other than expected ⁽²⁾	180,652,191	54,003,440	234,655,631
3	Net gain/(loss) from individual salary increases other than expected ⁽²⁾	106,041,812	-60,574,055	45,467,757
4	Net gain/(loss) from contributions other than expected	-174,255,980	-42,872,978	-217,128,958
5	Net gain/(loss) from administrative expenses other than expected	-2,388,142	628,430	-1,759,712
6	Net gain/(loss) from other experience ⁽²⁾	-304,249,374	<u>-71,810,412</u>	-376,059,786
7	Net experience gain/(loss): 1 + 2 + 3 + 4 + 5 + 6	-\$345,581,126	-\$161,733,024	-\$507,314,150

Details on page 23.

Note: This chart has been expanded in 2019 to show the effect of contribution experience and administrative expense experience on the total gain/(loss).

Details on page 26. Does not include the effect of plan or assumption changes, if any.

Investment Rate of Return

A major component of projected asset growth is the assumed rate of return. The assumed return should represent the expected long-term rate of return, based on the PERS investment policy. For valuation purposes, the assumed rate of return on the actuarial value of assets for the 2018-2019 plan year is 7.50%. The actual rates of return on an actuarial basis for the 2018-2019 plan year were 7.02% for Regular and 7.06% for Police/Fire.

Since the actual return for the year was less than the assumed return, PERS experienced an actuarial loss during the year ended June 30, 2019 with regard to its investments.

ACTUARIAL VALUE INVESTMENT EXPERIENCE FOR YEAR ENDED JUNE 30, 2019

	Regular	Police/Fire	Total
1 Actual return	\$2,230,820,715	\$654,177,997	\$2,884,998,712
2 Average value of assets	31,762,697,975	9,270,472,611	41,033,170,586
3 Actual rate of return: 1 ÷ 2	7.02%	7.06%	7.03%
4 Assumed rate of return	7.50%	7.50%	7.50%
5 Expected return: 2 × 4	2,382,202,348	695,285,446	3,077,487,794
6 Actuarial gain/(loss): 1 – 5	<u>-\$151,381,633</u>	<u>-\$41,107,449</u>	<u>-\$192,489,082</u>

Because actuarial planning is long term, it is useful to see how the assumed investment rate of return has followed actual experience over time. The chart below shows the rate of return on an actuarial basis compared to the market value investment return for the last ten years, including five-year and ten-year averages.

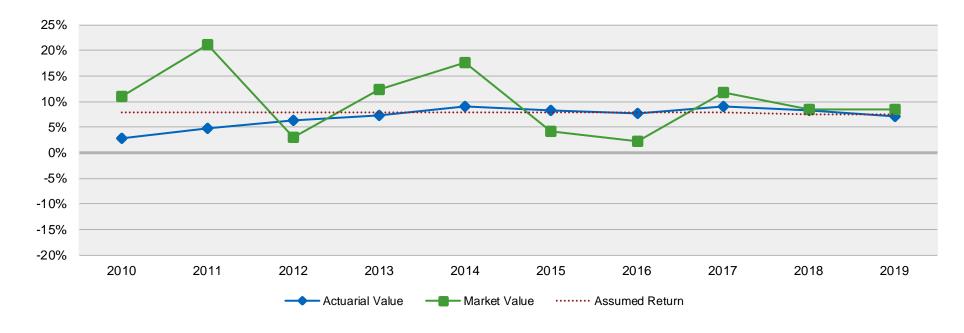

INVESTMENT RETURN - ACTUARIAL VALUE VS. MARKET VALUE: 2010 - 2019

Regular					Police/Fire				Total

2017	3,195,254,603	11.82%	2,529,012,783	9.12%	917,155,134	11.82%	722,225,866	9.08%	4,112,409,737	11.82%	3,251,238,649	9.11%
2018	2,531,944,593	8.50%	2,447,884,797	8.21%	732,574,827	8.50%	705,926,799	8.18%	3,264,519,420	8.50%	3,153,811,596	8.20%
2019	2,695,615,596	8.47%	2,230,820,715	7.02%	787,003,317	8.47%	654,177,997	7.06%	3,482,618,913	8.47%	2,884,998,712	7.03%
Total	22,311,506,587		17,623,082,275		6,190,651,644		5,002,056,462		28,502,158,231		22,625,138,737	
Five-year aver	rage return	7.15%		8.04%		7.18%		8.06%		7.16%		8.04%
Ten-year avera	age return	9.48%		7.25%		9.40%		7.40%		9.46%		7.28%

Note: Each year's yield is weighted by the average asset value in that year.

In the preceding Subsection B we described the actuarial asset valuation method that gradually takes into account fluctuations in the market value rate of return. The effect of this method is to stabilize the actuarial rate of return, which contributes to leveling pension plan costs. This effect is clear in the chart below, where the year-to-year returns on actuarial value are less volatile than the returns on market value.

MARKET AND ACTUARIAL RATES OF RETURN FOR YEARS ENDED JUNE 30, 2010 - 2019

Other Experience

There are other differences between the expected and the actual experience that appear when the new valuation is compared with the projections from the previous valuation. These include the extent of turnover among the participants, retirement experience (earlier or later than projected), mortality (more or fewer deaths than projected), the number of disability retirements, and salary increases different than assumed, and post-retirement benefit increases (PRBIs) different than expected.

The net gain/loss from this other experience for the year ended June 30, 2019 amounted to a loss of \$17.6 million for Regular and a loss of \$78.4 million for Police/Fire, which are 0.04% and 0.61% of the actuarial accrued liability, respectively. A brief summary of the demographic gain/(loss) experience (excluding contribution and administrative expense experience) of the PERS for the year ended June 30, 2019 is shown in the chart below.

EXPERIENCE DUE TO SOURCES OTHER THAN INVESTMENT RETURN FOR YEAR ENDED JUNE 30, 2019

	Regular	% of AAL	Police/Fire	% of AAL	Total	% of AAL
Age and Service Retirements	-\$232,809,323	-0.52%	-\$56,908,299	-0.45%	-\$289,717,622	-0.50%

Pre and Post-Retirement Mortality	-9,574,598	-0.02%	-20,902,768(1)	-0.16%	-30,477,366	-0.05%
Post-Retirement Benefit Increases (PRBIs)(2)	180,652,191	0.40%	54,003,440	0.42%	234,655,631	0.41%
Withdrawal From Employment	-21,267,085	-0.05%	-10,623,890	-0.08%	-31,890,975	-0.06%
Individual Pay and Service Increases	106,041,812	0.24%	-60,574,055	-0.47%	45,467,757	0.08%
Active New Entrants	-65,052,748	-0.14%	-7,353,398	-0.06%	-72,406,146	-0.13%
Active Rehires	-37,983,884	-0.08%	-2,437,489	-0.02%	-40,421,373	-0.07%
Retiree Return to Active	18,220,240	0.04%	0	0.00%	18,220,240	0.03%
Inactive and Retiree Showups	-60,834,051	-0.14%	-10,115,642	-0.08%	-70,949,693	-0.12%
Data Adjustments	44,979,780	0.10%	9,103,987	0.07%	54,083,767	0.09%
Other ⁽³⁾	71,694,577	<u>0.16%</u>	30,460,673	0.24%	102,155,250	<u>0.18%</u>
Total Liability Experience Gain/(Loss) During Year	-\$17,555,371	-0.04%	-\$78,381,027	-0.61%	-\$95,936,398	-0.17%

⁽¹⁾ Reflects Police/Fire mortality experience and also the assumption that existing "employer-pay" Police/Fire retirees with an unmodified option who retired after June 30, 1981 and before July 1, 2011 have been valued assuming no surviving spouse.

⁽²⁾ Includes the effect of benefit adjustments due to the PRBI audit for some members. The adjustments for the remaining affected members are expected to be reflected in the gain/loss for the year ending June 30, 2020.

⁽³⁾ Other gain/(loss) includes actual purchase of service contributions of \$59.3 million for Regular and \$39.1 million for Police/Fire.

D. Calculated Contribution Rates

The amount of annual contribution required to fund the Plan is comprised of a normal cost payment and a payment on the unfunded actuarial accrued liability. This total amount is then divided by the projected payroll for active members to determine the actuarially determined contribution rate.

The statutory contribution rates are adjusted at the beginning of each odd-numbered fiscal year, based on the actuarially determined rates indicated in the actuarial valuation report for the immediately preceding year. See Section 4, Exhibit III for details about this adjustment.

CALCULATED CONTRIBUTION RATES FOR YEAR BEGINNING JULY 1

	20	019	20)18
	Regular	Police/Fire	Regular	Police/Fire
Employer-Pay, Current Statutory Rate ⁽¹⁾	29.25%	42.50%	28.00%	40.50%

⁽²⁾ See cost-sharing mechanism in NRS 286.410.

Reconciliation of Actuarially Determined Contribution Rate

The actuarially determined contribution rates as of June 30, 2019 are based on all of the data described in the previous sections, the actuarial assumptions described in Section 4, and the Plan provisions adopted at the time of preparation of the Actuarial Valuation. They include all changes affecting future costs, adopted benefit changes, actuarial gains and losses and changes in the actuarial assumptions.

The chart below details the changes in the actuarially determined contribution rate from the prior rate-setting year to the current year's valuation.

RECONCILIATION OF ACTUARIALLY DETERMINED CONTRIBUTION RATE(1) FROM JUNE 30, 2018 TO JUNE 30, 2019

	Regular	Estimated Annual Dollar Cost ⁽²⁾	Police/Fire	Estimated Annual Dollar Cost ⁽²⁾
Actuarially Determined Contribution Rate as of June 30, 2018	29.56%	\$1,605,425,668	42.69%	\$460,111,624
Effect of investment (gain)/loss	0.16%	8,994,599	0.20%	2,242,948
Effect of (gains)/losses on individual salary experience	-0.11%	-6,300,656	0.29%	3,305,106
Effect of existing amortization of payroll growth less than expected	0.18%	39,000,017(3)	0.18%	11,511,787 ⁽³⁾
Effect of changes in normal cost	-0.19%	24,578,423(4)	-0.18%	13,059,014(4)
Effect of contributions (more)/less than expected	0.18%	10,353,717	0.21%	2,339,281
Effect of (gain)/loss on post-retirement benefit increases	-0.19%	-10,733,759	-0.26%	-2,946,593
Effect of other (gains)/losses ⁽⁵⁾	<u>0.32%</u>	<u>19,007,039</u>	0.34%	<u>3,991,481</u>
Total change	<u>0.35%</u>	<u>\$84,899,380</u>	0.78%	\$33,503,024
Actuarially Determined Contribution Rate as of June 30, 2019	29.91%	\$1,690,325,048	43.47%	\$493,614,648

⁽¹⁾ Average rate for the Employer-pay and Employee/Employer pay plans.

Based on rate payroll for each valuation date shown.

Actual dollar increase in existing amortization bases.

Actual dollar increase/(decrease) in normal cost.

Estimated annual dollar cost also reflects change in payroll from the June 30, 2018 valuation.

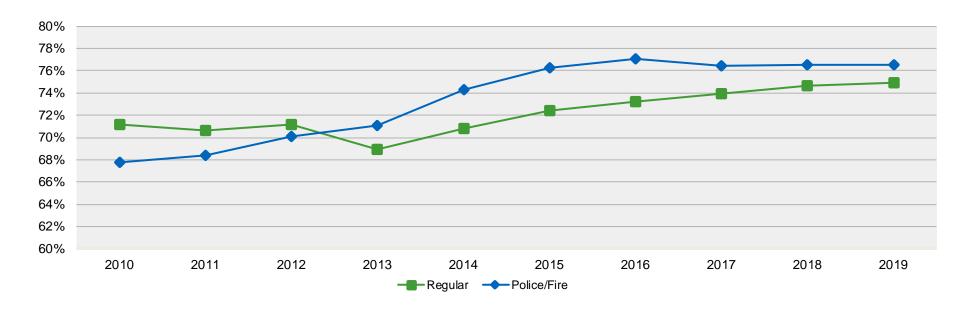

E. Funded Ratio

One critical piece of information regarding the Plan's financial status is the funded ratio. This ratio compares the actuarial value of assets to the actuarial accrued liabilities of the plan.

The funded status measures shown in this valuation are appropriate for assessing the need for or amount of future contributions. However, they are not necessarily appropriate for assessing the sufficiency of Plan assets to cover the estimated cost of settling the Plan's benefit obligations.

High ratios indicate a well-funded plan with assets sufficient to cover the plan's liabilities. Lower ratios may indicate recent changes to actuarial assumptions, benefit structures, funding of the plan below actuarial requirements, poor asset performance, or a variety of other factors.

FUNDED RATIO FOR YEARS ENDING JUNE 30, 2010 – 2019

Section 2: Valuation Results as of June 30, 2019 for the Public Employees' Retirement System of Nevada

F. Risk Assessment

Since the actuarial valuation results are dependent on a fixed set of assumptions and data as of a specific date, there is risk that emerging results may differ, perhaps significantly, as actual experience is fluid and will not exactly track current assumptions. This potential divergence may have a significant impact on the future financial condition of the plan.

This section does not contain a detailed analysis of the potential range of future measurements, but does include a concise discussion of some of the primary risks that may affect the Plan's future financial condition. We recommend a more detailed assessment of the risks to provide the Board with a better understanding of the risks inherent in the Plan that can inform both financial preparation and future decision making. This assessment would enable us to work with the Board to highlight and illustrate particular risks or potential future outcomes that the Board may be interested in discussing and could include tailored scenario testing, sensitivity testing, stress testing and stochastic modeling.

This section provides descriptions and basic assessments of the primary risks that are likely to have an ongoing influence on the Plan's financial health, as well as a discussion of historical trends and maturity measures.

Risk Assessments

Asset/Liability Mismatch Risk (the potential that future plan experience does not affect asset and liability values in the same way, causing them to diverge)

The most significant asset/liability mismatch risk to the Plan is investment risk, as discussed below. In fact, investment risk has the potential to impact asset/liability mismatch in two ways. The first mismatch is evident in annual valuations: when asset values deviate from assumptions, they are typically independent from liability changes. The second mismatch can be caused when systemic asset deviations from assumptions may signal the need for an assumption change, which causes liability values and contribution rates to move in the opposite direction from any changes in the expected experience of asset growth rates.

Asset/liability mismatch can also be caused by demographic assumption risk such as longevity, which affects liabilities but have no impact on asset levels. This risk is also discussed below.

Investment Risk (the risk that investment returns will be different than expected)

The investment return assumption is a long-term, static assumption for valuation purposes even though in reality market experience can be quite volatile in any given year. That volatility can cause significant changes in the financial condition of the plan, affecting both funded status and contribution rates. The inherent year-to-year volatility is reduced by smoothing through the Actuarial Value of Assets, however investment experience can still have a sizable impact.

The market value rate of return over the last 10 years has ranged from a low of 2.27% to a high of 21.10%.

Longevity Risk (the risk that mortality experience will be different than expected)

The actuarial valuation includes current life expectancy assumptions and an expectation of future improvement in life expectancy, which are significant assumptions given the relatively long duration of liabilities for pension plans. Emerging plan experience that does not match these expectations will result in increases or decreases in the actuarially determined contribution over time. This risk can be reduced by using tables appropriate for the Plan (public experience tables) that are weighted by benefit levels, and by using generational mortality projections. The current mortality assumption of the Plan is based on a headcount-weighted table with a static projection.

Other Risks

In addition to longevity, the valuation includes a variety of other assumptions that are unlikely to match future experience exactly. One example is projected salary scales over time. As salary is central to the determination of benefits paid in retirement, deviations from the projected salary scales could have a material impact on the benefits anticipated for each member. Examples of demographic assumptions include retirement, termination and disability assumptions, and will likely vary in significance for different cost groups.

Some plans also carry significant contribution risk, defined as the potential for actual future contributions deviating from expected future contributions. However, the employers have a proven track record of contributing at the statutory contributions that are closely related to the Actuarially Determined Contributions based on the Board's Actuarial Funding Policy, so contribution risk is minimal.

Based on the Plan's amortization policy, any new UAAL from actuarial gains, losses or assumption changes is amortized over a "closed" amortization period of 20 years as a level percentage of payroll. The assumed total payroll growth rates used to compute the UAAL amortization payment are set by the Board and are currently 5.50% per year for Regular and 6.50% for Police/Fire. Prior to 2009, total payroll growth had historically met or exceeded the assumptions, however actual experience in recent years has been less than assumed. This relatively high total payroll growth assumption has the following impact on the funding of the UAAL and contribution rates:

- The relatively high total payroll growth assumption results in a UAAL contribution progression that starts low and increases materially over time. This causes a significant amount of negative amortization, where even with full expected payments the outstanding balance of a new UAAL layer will be larger than the original balance for the first 8 years for Regular and 10 years for Police/Fire before falling below the original level. This planned expansion of UAAL in the near future further exposes the System to the other risks detailed in this section.
- In years when the actual total payroll growth is less than the assumption, the System will receive less UAAL contributions than expected. This "contribution loss" could lead to future contribution rate increases.

Evaluation of Historical Trends

Past experience can help demonstrate the sensitivity of key results to the Plan's actual experience. Over the past ten years:

- The funded percentage on the actuarial value of assets basis has increased from 71.2% to 74.9% for Regular and 67.8 to 76.5% for Police/Fire. This is primarily due to contributions made to amortize the UAAL using a 20-year amortization period (as compared to 30-year amortization period used before 2012) and average investment return over recent years higher than the assumption on a smoothed basis and other experience. For a more detailed history see Section 2, Subsection E, Funded Ratio on page 29.
- The average investment return weighted by the actuarial value of assets over the last 10 years was 7.28%. This includes a high of a 9.15% return and a low of 2.84%. The average over the last 5 years was 8.04%. For more details see the Investment Return table in Section 2, Subsection C on page 24.
- A major source of new UAAL was the strengthening of assumptions through multiple assumption changes. For example, the assumption changes in 2013 updated mortality tables and other assumptions, adding \$1,460 million in unfunded liability. The assumption changes in 2017 changed the discount rate from 8.00% to 7.50% and updated mortality tables and other assumptions, adding \$1,046 million in unfunded liability. For more details on the unfunded liability changes see Section 3, Exhibit H, Table of Amortization Bases starting on page 44.

Maturity Measures

In the last 10 years the ratio of non-active members to active participants has increased from 0.55 to 0.81 for Regular and 0.50 to 0.75 for Police/Fire. An increased ratio indicates that the plan has grown in maturity over time. This is to be expected, but is also informative for understanding plan sensitivity to particular risks. For more details see Section 2, Subsection A, Member Data on pages 13 and 16.

As pension plans mature, the cash needed to fulfill benefit obligations will increase over time. Therefore, cash flow projections and analysis should be performed to assure that the Plan's asset allocation is aligned to meet emerging pension liabilities. For the prior year, benefits and expenses paid were \$618 million more than contributions received. This outflow is 1.4% of the market value of assets. Plans with higher levels of negative cash flows have a need for a larger allocation to income generating assets, which can create a drag on investment return. For more details on historical cash flows see the Comparison of Contributions with Benefits and Expenses in Section 2, Subsection B, Financial Information on page 19.

Starting in the year ended June 30, 2017, pursuant to GASB Statement No. 82, the financial statements recognize half of the employer contributions made on behalf of Employer-Pay members as member contributions.

⁽²⁾ Net of investment fees.

⁽³⁾ Includes transfers in/out of the System (e.g. to the Judicial Retirement System) that correspond to transfers of liability.

EXHIBIT G – DEVELOPMENT OF UNFUNDED ACTUARIAL ACCRUED LIABILITY FOR YEAR ENDED JUNE 30, 2019

	Regular	Police/Fire	Total
1 Unfunded actuarial accrued liability at beginning of year	\$10,876,018,258	\$2,851,042,444	\$13,727,060,702
2 Normal cost at beginning of year	888,319,668	281,377,993	1,169,697,661
3 Expected total contributions at beginning of year	-1,605,557,476	-460,099,096	-2,065,656,572
4 Expected administrative expenses at beginning of year	8,146,612	1,616,696	9,763,308
5 Interest for whole year on 1 + 2 + 3 + 4	762,519,530	200,545,350	963,064,880
6 Expected unfunded actuarial accrued liability at end of year	\$10,929,446,592	\$2,874,483,387	\$13,803,929,979
7 Changes due to			
a) Investment loss	\$151,381,633	\$41,107,449	\$192,489,082
b) Post-retirement benefit increases lower than expected	-180,652,191	-54,003,440	-234,655,631
c) Individual salary increases higher/(lower) than expected	-106,041,812	60,574,055	-45,467,757
d) Contributions less/(greater) than expected ⁽¹⁾	174,255,980	42,872,978	217,128,958
e) Administrative expenses greater/(less) than expected	2,388,142	-628,430	1,759,712
f) Other experience	304,249,374	71,810,412	376,059,786
Total changes	<u>\$345,581,126</u>	<u>\$161,733,024</u>	<u>\$507,314,150</u>
8 Unfunded actuarial accrued liability at end of year	<u>\$11,275,027,718</u>	<u>\$3,036,216,411</u>	<u>\$14,311,244,129</u>

⁽¹⁾ The contribution loss is due to the net effect of a) lower than expected payroll growth, b) statutory contribution rates lower than the actuarially determined contribution rates, and c) timing effect of actuarially determined contributions payable at the beginning of the year vs. actual contributions payable throughout the year.

Note: This chart has been changed in 2019 to use expected contributions and expected administrative expenses in the development of the expected unfunded actuarial liability, which shows the effect of contribution experience and administrative expense experience on the total gain/(loss).

⁽¹⁾ Level percentage of payroll with payroll expected to increase 5.50% per year for Regular and 6.50% per year for Police/Fire. Payments shown as of beginning of year.

⁽²⁾ Effective average amortization period. Combined Regular and Police/Fire average amortization period is 16.9.

EXHIBIT I – DEFINITIONS OF PENSION TERMS

The following list defines certain technical terms for the convenience of the reader:

Assumptions or Actuarial Assumptions:	The estimates on which the cost of the Plan is calculated including: a) Investment return – the rate of investment yield that the Plan will earn over the long-term future; b) Mortality rates – the death rates of employees and pensioners; life expectancy is based on these rates; c) Retirement rates – the rate or probability of retirement at a given age; d) Termination rates – the rates at which employees of various ages are expected to leave employment for reasons other than death, disability, or retirement.
Normal Cost:	The amount of contributions required to fund the level cost allocated to the current year of service.
Actuarial Accrued Liability for Actives:	The value of all projected benefit payments for current members less the portion that will be paid by future normal costs.
Actuarial Accrued Liability for Pensioners:	The single sum value of lifetime benefits to existing pensioners. This sum takes account of life expectancies appropriate to the ages of the pensioners and the interest that the sum is expected to earn before it is entirely paid out in benefits.
Unfunded Actuarial Accrued Liability:	The extent to which the actuarial accrued liability of the Plan exceeds the assets of the Plan.
Amortization of the Unfunded Actuarial Accrued Liability:	Payments made over a period of years equal in value to the Plan's unfunded actuarial accrued liability.
Investment Return:	The rate of earnings of the Plan from its investments, including interest, dividends and capital gain and loss adjustments, computed as a percentage of the average value of the fund. For actuarial purposes, the investment return often reflects a smoothing of the capital gains and losses to avoid significant swings in the value of assets from one year to the next.

Section 4: Reporting Information

EXHIBIT I – SUMMARY OF ACTUARIAL VALUATION RESULTS

The valuation was made with respect to the following data supplied to us:

1 Retired members as of the valuation date (including 7,590 beneficiaries and survivors in pay status)	70,056
2 Members inactive during year ended June 30, 2019 with vested rights	17,341
3 Members active during the year ended June 30, 2019	<u>109,167</u>
4 Total members	196,564

The actuarial factors as of the valuation date are as follows:

1	Normal cost ⁽¹⁾		
	Regular members	\$912,898,091	
	Police/Fire members	294,437,007	
	Total normal cost		\$1,207,335,098
2	Actuarial accrued liability		
	Retired members and beneficiaries	\$33,414,664,401	
	Inactive members with vested rights	1,618,501,306	
	Active members	22,887,050,266	
	Total actuarial accrued liability		\$57,920,215,973
3	Actuarial value of assets (\$44,284,252,583 at market value as reported by the Retirement Office)		43,608,971,844
4	Unfunded actuarial accrued liability: 2 - 3		\$14,311,244,129
5	Total rate payroll		\$6,786,900,381

⁽¹⁾ Does not include administrative expenses.

EXHIBIT II – ACTUARIAL ASSUMPTIONS AND METHODS

Rationale for Assumptions:	The information and analysis used in selecting each assumption that has a significant effect on this actuarial valuation is shown in the Actuarial Experience Study dated October 16, 2017. These assumptions were adopted by the Board.
Economic Assumptions	
Net Investment Return:	7.50% (including 2.75% for inflation)
	Based on the actuarial experience study referenced above, expected investment expenses represent about 0.10% of the actuarial value of assets.
Consumer Price Index:	Increase of 2.75% per year
Administrative Expenses:	0.15% of payroll added to normal cost

Salary Increases:

Inflation: 2.75% plus Productivity pay increases: 0.50% plus

Promotional and merit salary increases:

Promotional and Merit Salary Increases				
Years of	Rate (%)			
Service	Regular	Police/Fire		
Less than 1	5.90	10.65		
1	4.80	7.15		
2	4.00	5.20		
3	3.60	4.60		
4	3.30	4.30		
5	3.00	4.15		
6	2.80	3.90		
7	2.70	3.50		
8	2.50	3.15		
9	2.35	2.90		
10	2.15	2.50		
11	1.75	1.90		
12	1.50	1.50		
13	1.25	1.30		
14	1.10	1.30		
15 & Over	1.00	1.30		

Future salary increases are assumed to occur at the beginning of the year.

Total Payroll Growth: Assumed payroll growth rates are used to compute the unfunded actuarial accrued liability amortization payments as a level percentage of projected payroll. For this valuation, the payroll for the coming year is based on actual annualized payroll for the actives as of the valuation date and projected by the salary scale. For the purpose of calculating the actuarially determined contribution rate, the total payroll growth assumption for future years is 5.50% per year for Regular and 6.50% for Police/Fire. The payroll growth assumptions are set by the Board and affect the timing of payments toward the unfunded liabilities. Considerations for setting these assumptions include future financial conditions that are difficult for Segal to evaluate. In recent years, payroll growth has been less than assumed. This has the effect of delaying contributions toward the unfunded liabilities and could result in increases to required contributions in future years. We recommend that the Board closely monitor actual payroll growth to verify that the assumptions remain valid. Post-Retirement Benefit Increases: For current retirees and beneficiaries, future Post-Retirement Benefit Increases reflect actual changes in historical CPI and are assumed to follow the formulas described in Exhibit III of this section. For future retirees. those hired prior to 2010 are assumed to reach the cap after 16 years of retirement. Those hired in between 2010 and 2015 are also assumed to reach the cap after 16 years of retirement. Those hired after 2015 will never receive an annual increase that exceeds 2.75%. Underlying all of these assumptions is that CPI will grow over time at a rate of 2.75% per year. **Demographic Assumptions Mortality Rates:** Pre-Retirement Regular and Police/Fire: Headcount-Weighted RP-2014 Employee Table, projected to 2020 with Scale MP-2016. Healthy • Regular and Police/Fire: Headcount-Weighted RP-2014 Healthy Annuitant Table projected to 2020 with Scale MP-2016, set forward one year for spouses and beneficiaries. For ages less than 50⁽¹⁾, mortality rates are based on the Headcount-Weighted RP-2014 Employee Mortality Tables. Those mortality rates are adjusted by the ratio of the mortality rate for members at age 50 to the mortality rate at age 50 from the Employee mortality tables listed above. The mortality rates are then projected to 2020 with Scale MP-2016. Disabled Regular and Police/Fire: Headcount-Weighted RP-2014 Disabled Retiree Table, set forward four years. The RP-2014 Headcount-Weighted Mortality Tables, set forward one year for spouses and beneficiaries, reasonably reflect the projected mortality experience of the Plan as of the measurement date. The additional projection of 6 years is a provision made for future mortality improvement. The RP-2014 Healthy Annuitant Mortality Tables have rates only for ages 50 and later.

Termination Rates Before Retirement:

	Mortality Rates (%)		
	Regular and Police/Fire		
Age	Male	Female	
20	0.05	0.02	
25	0.06	0.02	
30	0.06	0.03	
35	0.07	0.04	
40	0.08	0.05	
45	0.11	0.08	
50	0.19	0.13	
55	0.32	0.20	
60	0.55	0.30	

Any mortality that occurs during the first two years of employment is assumed to be non-duty related.

Termination Rates Before Retirement (Continued):

Years of	Terminatio	n Rates (%)
Service	Regular	Police/Fire
0 – 1	16.00	15.00
1 – 2	12.50	8.00
2 – 3	10.25	7.50
3 – 4	8.00	6.00
4 – 5	7.50	5.00
5 – 6	6.00	3.75
6 – 7	5.25	3.50
7 – 8	4.25	2.50
8 – 9	4.00	2.25
9 – 10	3.75	1.90
10 – 11	3.25	1.50
11 – 12	3.00	1.30
12 – 13	2.75	1.00
13 – 14	2.50	0.90
14 – 15	2.25	0.80
15 – 16	2.00	0.70
16 – 17	2.00	0.60
17 – 18	1.75	0.50
18 – 19	1.75	0.50
19 – 20	1.75	0.50
20 & Over	1.75	0.45

No termination is assumed after a member reaches earliest unreduced retirement age.

Termination Rates Before Retirement (Continued):

	Disability Rates (%)			
Age	Regular	Police/Fire		
20 – 24	0.01	0.00		
25 – 29	0.03	0.06		
30 - 34	0.06	0.12		
35 - 39	0.10	0.30		
40 – 44	0.21	0.45		
45 – 49	0.35	0.65		
50 – 54	0.60	0.80		
55 – 59	0.75	0.65		
60 - 64	0.35	0.50		
65 & Over	0.00	0.00		

Disability rates are applied only for members with more than 5 years of service and less than 30 years of service for Regular members with an effective date of membership before July 1, 2015, less than 33 1/3 years of service for Regular members with an effective date of membership on or after July 1, 2015, or 25 years for Police/Fire members.

Retirement Rates:

Regular members with an effective date of membership before July 1, 2015:

			Years of	Service (%)		
Age	5 – 9	10 – 19	20 – 24	25 – 29	30 – 32	33 or More
45-49	0.00	0.00	0.75	6.50	16.00	16.00
50-54	0.50	1.50	1.50	8.50	18.00	18.00
55-59	1.50	3.50	5.00	12.00	20.00	20.00

Retirement Age for Inactive Vested Members:	Earliest unreduced		and with a local to a local		lk not on orifical D	
Unknown Data for Members:			ers with similar kno Fire members are a			egular members are
Form of Payment:	All active and inac	tive members are	e assumed to elect	the unmodified opti	on at retirement (Option 1).
Percent Married:	Since pre-retirement death benefits are payable to a surviving beneficiary of an unmarried member, all members are assumed to have a beneficiary upon pre-retirement death.					
	The unmodified option is a straight life annuity except for "employer-pay" Police/Fire retirees, for whom it is a 50% joint and survivor annuity. Existing "employer-pay" Police/Fire retirees with an unmodified option who retired after June 30, 1981 and before July 1, 2011 have been valued assuming no surviving spouse, pending the results of an analysis and verification of spousal information. 70% of "employer-pay" Police/Fire male members and 55% of "employer-pay" Police/Fire female members are assumed to be married at retirement.					
Age of Spouse:	Male members 3 y	ears older than t	heir spouses, fema opposite sex of the		s younger than the	eir spouses.
Dependent Children:	The assumption for younger than the		dren in the actuaria	I valuation is one de	ependent child wh	o is 28 years

Actuarial Methods	
Actuarial Cost Method:	Entry Age Normal Actuarial Cost Method. Entry Age is the age at the time the participant commenced employment. Normal Cost and Actuarial Accrued Liability are calculated on an individual basis and are based on costs allocated as a level percentage of salary, with Normal Cost determined based on the plan provisions and benefit accrual rate applicable to that individual.
Actuarial Value of Assets:	Market value of assets less unrecognized returns in each of the last five years. Unrecognized return is equal to the difference between the actual market return and the expected return on the actuarial value, and is recognized over a five-year period, further adjusted, if necessary, to be within 30% of the market value.
Amortization Policy:	The UAAL, (i.e., the difference between the Actuarial Accrued Liability and the Valuation Value of Assets), as June 30, 2011 shall continue to be amortized over separate 30-year period amortization layers based on the valuations during which each separate layer was previously established.
	Any new UAAL as a result of actuarial gains or losses identified in the annual valuation as of June 30 will be amortized over a period equal to the truncated average remaining amortization period of all prior UAAL layers. This would occur until the average remaining amortization period is less than 20 years. At that point, amortization periods of 20 years would be used for actuarial gains and losses.
	Any new UAAL as a result of change in actuarial assumptions or methods will be amortized over a period equator to the truncated average remaining amortization period of all prior UAAL layers. This would occur until the average remaining amortization period is less than 20 years. At that point, amortization periods of 20 years would be used for assumption or method changes.
	Unless an alternative amortization period is recommended by the Actuary and accepted by the Board based of the results of an actuarial analysis:
	 a) with the exception noted in b., below, the increase in UAAL as a result of any plan amendments will be amortized over a period of 15 years;
	 the increase in UAAL that would result from a temporary retirement incentive will be pre-funded by the participating employer(s).
	UAAL layers shall be amortized over "closed" amortization periods so that the amortization period for each layer decreases by one year with each actuarial valuation.
	UAAL layers shall be amortized as a level percentage of payroll so that the amortization amount in each year during the amortization period shall be expected to be a level percentage of covered payroll, taking into consideration the current assumption for general payroll increase.
	If an overfunding exists (i.e., the total of all UAAL becomes negative so that there is a surplus), such surplus and any subsequent surpluses will be amortized over an "open" amortization period of 30 years. Any prior UAAL amortization layers will be considered fully amortized, and any subsequent UAAL will be amortized over 20 years as the first of a new series of amortization layers.

Amortization Policy (Continued):	These amortization policy components will apply separately to each of the Regular and Police/Fire UAAL cost groups.
Changes in Actuarial Assumptions and Methods:	There have been no changes in actuarial assumptions or methods since the last valuation.

EXHIBIT III – SUMMARY OF PLAN PROVISIONS

This exhibit summarizes the major provisions of the Nevada Public Employees' Retirement Act included in the valuation. It is not intended to be, nor should it be interpreted as, a complete statement of all plan provisions.

Plan Year:	July 1 through June 30
Service Retirement:	
	For members with an effective date of membership before January 1, 2010:
Requirement for Regular Members	Age 65 with five years of service, or age 60 with ten years of service, or at any age with 30 years of service.
Requirement for Police/Fire Members	Age 65 with five years of service, or age 55 with ten years of Police/Fire service, or age 50 with 20 years of Police/Fire service, or at any age with 25 years of Police/Fire service.
Benefit	2.67% of final average compensation (average of 36 highest consecutive months) per year of service earned on or after July 1, 2001 plus 2.50% of final average compensation per year of service before July 1, 2001. Maximum benefits are 90% of average compensation for individuals who became members before July 1, 1985 and 75% of average compensation for individuals who became members after June 30, 1985.
	For members with an effective date of membership on or after January 1, 2010:
Requirement for Regular Members	Age 65 with five years of service, or age 62 with ten years of service, or at any age with 30 years of service.
Requirement for Police/Fire Members	Age 65 with five years of service, or age 60 with ten years of Police/Fire service, or age 50 with 20 years of Police/Fire service, or at any age with 30 years of Police/Fire service.
Benefit	2.50% of final average compensation (average of 36 highest consecutive months) per year of service. Maximum benefits are 75% of average compensation.
	For Regular members with an effective date of membership on or after July 1, 2015:
Requirement	Age 65 with five years of service, or age 62 with ten years of service, or age 55 with 30 years of service, or any age with 33 1/3 years of service. Purchased service generally may not be counted toward years needed to attain eligibility.
Benefit	2.25% of final average compensation (average of 36 highest consecutive months) per year of service. Maximum benefits are 75% of average compensation.
Limitation on Compensation Used in Determining Retirement Benefits:	For any member with an effective date of membership on or after July 1, 2015, compensation used in determining retirement benefits is limited to \$200,000. This limit shall be adjusted annually based on CPI.

Early Retirement:	
Requirement	Any age with five years of service.
Benefit	For members with an effective date of membership before January 1, 2010:
	Accrued retirement benefit reduced 4% per year for each year that the member is under the age required for service retirement.
	For members with an effective date of membership on or after January 1, 2010:
	Accrued retirement benefit reduced 6% per year for each year that the member is under the age required for service retirement.
Disability:	
Requirement	Five years of service and totally unable to perform current job or any comparable job for which the member is qualified by training and experience, because of injury or illness of a permanent nature, provided the member is in the employ of a participating employer at the time of application for disability retirement.
Benefit	Accrued service retirement benefit without reduction for age. (System disability benefit is reduced for other benefits received on account of same disability, if such other benefits are financed by a Nevada public employer, to the extent that total disability benefits would otherwise exceed 100% of final average compensation.)
Vesting:	
Requirement	Any age with five years of service, provided the member has not received a refund of member contributions.
Benefit	Accrued service retirement benefit payable upon attainment of age 65 if member has between five and ten years of service at termination, or upon attainment of the age required for service retirement if member has ten or more years of service at termination.

Spouse's Pre-Retirement Death Benefit:			
Requirement	Eligible survivors of an active member who dies receive survivor benefits if: (a) the deceased member had two years of service in the 2½ years immediately preceding death; or (b) the deceased member had ten years of service; or (c) death was caused by occupational disease or a service-connected accident regardless of the deceased member's length of service; or (d) death occurred within 18 months after termination of employment where mental or physical condition required the termination; or (e) death occurred while member was on leave of absence for training and member met requirements of (a) at time such leave began.		
Benefit	 a) Unmarried children under age 18, or age 18 to 23 and attending an accredited school on a full-time basis: \$400 per month per child. Payments cease upon attaining age 18 or age 23 if full-time student, unless child is incapacitated; or upon marriage, adoption, or death. 		
	b) Spouse, or survivor beneficiary of an unmarried member, of deceased member with fewer than ten years of service (and at least two years of service in the last 2½ years): \$450 per month. Payments cease upon death.		
	c) Spouse, or survivor beneficiary of an unmarried member, of deceased member with ten but fewer than 15 years of service: greater of \$450 per month or Option 3 benefit that would have been payable if deceased member had retired on date of death without reduction for early payment. Payments cease upon death.		
	d) Spouse, or survivor beneficiary of an unmarried member, of deceased member with 15 or more years of service: greater of \$450 per month or Option 2 benefit that would have been payable if deceased member had retired on date of death without reduction for early payment. Payments cease upon death.		
	e) Spouse, or survivor beneficiary of an unmarried member, of deceased member eligible to retire with respect to both age and service: greater of \$450 per month, Option 2 or Option 3 benefit that would have been payable if deceased member had retired on death, without reduction for early payment. Payments cease upon death.		
	f) Dependent parents: \$400 per month each, provided there are no other eligible survivors. Payments cease upon death.		
	g) Lump sum payment option: a spouse, or survivor beneficiary of an unmarried member, may waive right to monthly survivor benefits and instead receive a lump sum refund of deceased member's contributions plus half the contributions made under the Employer-Pay provisions, provided no other person is eligible for survivor benefits.		
Benefit Limitations	Total survivor benefits, including any other survivor benefit received from any other source, shall not exceed final average compensation (a) if the other benefit was provided or purchased by a public employer, except for lump sum payments under a group insurance program; and (b) to the extent that the total of the allowance and the other benefit would otherwise exceed the deceased member's final average compensation.		

Spouse's Pre-Retirement Death Benefit (Continued):	
Benefit for Certain Spouses	A member who begins receiving service or disability retirement benefits from the Police/Fire members retirement fund after June 30, 1981, is eligible to receive an unreduced service retirement allowance. Upon the death of such a retired member, a spouse who was the retired member's spouse at the time of retirement is entitled to receive 50% of the unreduced allowance; this benefit is payable to the surviving spouse beginning at age 50. A surviving spouse is not eligible to receive this 50% spouse's benefit if the retired member elects an optional benefit form at the time of retirement. Service performed after July 1, 1981, in positions other than as a Police/Fire member, except military service, is not credited toward this 50% spouse's benefit. Existing "employer-pay" Police/Fire retirees who retired after June 30, 1981 and before July 1, 2011 have been valued assuming no surviving spouse, pending the results of an analysis and verification of spousal information.
Benefit for Spouses of Members Killed in the Line of Duty:	The spouse of a member who is a police officer or firefighter killed in the line of duty on or after July 1, 2013, or the spouse of any other member killed in the course of employment on or after July 1, 2013, is entitled to receive a monthly allowance equal to the greater of: a) 50% of the salary of the member on the date of the member's death; or b) 100% of the retirement allowance that the member was eligible to receive based on the member's years of service obtained before the member's death without any reduction for age for the deceased member.
	The spouse may elect to receive this benefit in lieu of any other available death benefit.
	This benefit is also available to a survivor beneficiary of an unmarried member.

Post-Retirement Benefit Increases:				
Benefit	For members with an effective date of membership before January 1, 2010:			
	The lesser of			
	a) 2% per year following the third anniversary of the commencement of benefits, 3% per year following the sixth anniversary, 3 ½% per year following the ninth anniversary, 4% per year following the twelfth anniversary and 5% per year following the fourteenth anniversary, or			
	b) The annual benefit increase is equal to the average percentage increase in the Consumer Price Index (or other Board approved index) for the three preceding years.			
	In any event, a member's benefit must be increased by the percentages in paragraph (a) if their benefit has not been increased at a rate greater than or equal to the average of the Consumer Price Index (All Items) (or other Board approved index) for the period between retirement and the date of increase.			
	For members with an effective date of membership on or after January 1, 2010 and before July 1, 2015:			
	Same as above, except the increases do not exceed 4% per year.			
	For members with an effective date of membership on or after July 1, 2015:			
	2% per year following the third through fifth anniversaries of the commencement of benefits;			
	2 1/2% per year following the sixth through eighth anniversaries.			
	On succeeding anniversaries the annual increase shall be the lesser of 3% or the CPI for the preceding calendar year.			
Optional Benefit Forms	Retirees may elect one of the following forms of payment:			
	Option 1 (unmodified) – Single life annuity except for:			
	Police/Fire members who contribute under the "employer pay" contribution plan, Option 1 is a 50% joint and survivor annuity			
	Option 2 – 100% joint and survivor			
	Option 3 – 50% joint and survivor			
	 Option 4 – 100% joint and survivor, with payments to beneficiary commencing at age 60 			
	 Option 5 – 50% joint and survivor, with payments to beneficiary commencing at age 60 			
	 Option 6 – Specific sum option up to 100% of allowance paid to retiree 			
	 Option 7 – Specific sum option up to 100% of allowance paid to retiree, with payments to beneficiary commencing at age 60 			
	If the beneficiary predeceases the retired member, the optional allowance reverts to the unmodified allowance.			

Contribution Rates:		For the fiscal years July 1, 2019 through June 30, 2021, statutory contribution rates as a percentage of compensation are as follows:				
		Regular	Police/Fire			
	Employer-Pay	29.25%	42.50%	'		
	Employee/Employer-Pay	15.25% / 15.25%	22.00% / 22.00%			
	actuarially determined rates are only adjusted upward if the and more than 0.25% higher more than 2.00% lower than 2.00%) and more than 1.00%	Total contribution rates are adjusted at the beginning of each odd-numbered fiscal year, based on the actuarially determined rates indicated in the actuarial valuation report for the immediately preceding year. Rates are only adjusted upward if the new rates are more than 0.50% higher than the existing rate for Employer-Pay and more than 0.25% higher for Employee/Employer. Rates are only adjusted downward if the new rates are more than 2.00% lower than the existing rate for Employer-Pay (and adjusted only by the amount in excess of 2.00%) and more than 1.00% lower than the existing rate for Employee/Employer (and adjusted only by the amount in excess of 1.00%). Rates are rounded to the nearest 0.25% of payroll.				
	credited to member accounts Pay provisions, final average	Under the Employer-Pay provisions, the contributions made by employers on behalf of members are not credited to member accounts and are not refunded upon termination. For members covered by the Employer-Pay provisions, final average compensation is increased by half the total contribution made by the public employer and may not be less than it would have been if contributions had been made by the member and the employer separately.				
Changes in Plan Provisions:	There were no changes in pl	an provisions since the	e last actuarial valuation	1.
